Summary

Full-stack Web Developer (Angular, React.js, Node.js) with 1+ years building scalable, production-ready applications. Unique QA-to-development background drives a quality-first engineering approach, resulting in reliable, well-tested features shipped on time.

Work Experience

Web Developer

04/2025 – present

Folkslogic Technologies

Mangalore, India

- Developed and maintained 2+ responsive Angular web applications with reusable, scalable UI components.
- Built 10+ RESTful APIs using Node.js and Express, reducing frontend-backend latency by 25%.
- Integrated PostgreSQL database with backend APIs supporting 1000+ daily requests.
- Utilized Angular services, guards, interceptors, and reactive forms across 3 major projects.
- Implemented push notifications via FCM for 2 mobile apps with 95% delivery success rate.
- Collaborated with cross-functional teams (design, QA, backend) to deliver 20+ features on schedule.

Software Test Engineer

06/2023 – 03/2025

Folkslogic Technologies

Mangalore, India

- Performed end-to-end manual testing (web + mobile) for 8 projects, ensuring 95%+ requirement coverage for functionality, usability, and business rules.
- Created 50+ test cases and 10+ test scenarios from functional/technical specs; maintained test plans across release cycles.
- Conducted API validation using Postman – verified status codes, response structure, headers, and payload data for REST services.
- Logged, prioritized, and tracked 100+ defects through the full lifecycle in Redmine, reducing average resolution time by delivering clear reproduction steps to developers.

Skills

Programming Languages: Javascript, Typescript

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Angular, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, Postgres

Tools & Technologies: Git & GitHub, REST APIs, Socket.io, FireBase, Postman, Vercel / Render
Deployment

Projects

Excess

Logistics Management

- Built UI features in Angular 17 using a component-based architecture with reusable modules.
- Integrated 15+ REST APIs using Angular HttpClient, reducing data fetch time by 20%.
- Developed backend APIs using Node.js, Express, and PostgreSQL to support frontend functionality.
- Implemented SendGrid email notifications processing 1,000+ transactional emails monthly with 99% delivery rate.
- Added Arabic (RTL) localization via Angular i18n, enabling support for 500+ new regional users.

SJMS

Safe Journey management System

- Integrated backend APIs with Angular frontend using HttpClient for seamless data handling and state management.
- Developed full-stack features using Node.js, Express, and PostgreSQL for API development and database operations.
- Implemented multi-language support including English, Arabic, and Hindi using Angular i18n.

Vision India

Subscription-Based Incentive Platform

- Built 10+ scalable backend APIs using Node.js and Express, supporting 5+ application features.
- Implemented Firebase Cloud Messaging (FCM) APIs to deliver real-time push notifications to mobile users.
- Integrated notification APIs with frontend components to enable seamless real-time updates.

Projects (MERN Stack)

CodeXa

A Full-Stack Interview Platform

- **Engineered a full-stack coding interview platform (MERN) featuring a VSCode-powered code editor, secure isolated code execution, and automated test-case validation with pass/fail feedback.**

- **Built real-time video conferencing** for 1-on-1 technical interviews using **WebRTC/video APIs**, including screen sharing, session recording, mic/camera controls, and **room-locking** for 2-participant sessions.
- **Implemented secure authentication and authorization with Clerk**, and designed a **real-time analytics dashboard** with live stats and **WebSocket-based chat messaging**.
- **Developed RESTful APIs with Node.js and Express**, optimized data fetching/caching using **TanStack Query (React Query)**, and processed **asynchronous background jobs with Inngest** for scalable performance.
- **Automated CI/CD workflows with Git/GitHub** (branching, pull requests, code reviews) using **CodeRabbit** for AI-driven PR analysis, and deployed the application on **Render**.

CraveX

A food delivery application for ordering food, tracking deliveries, and managing restaurant operations.

- Built UI screens using **React.js** with a **responsive layout** for mobile and desktop devices.
- Implemented secure user registration and login using **JWT authentication**.
- Developed backend APIs using Node.js and Express.js for application features.
- Used **MongoDB** to store and manage user, order, and menu data.
- Integrated **Razorpay** for secure online payment processing.

SparkGPT

SparkGPT is a MERN-based web application for AI-powered text and image generation.

- Built the frontend using React.js and Tailwind CSS, creating 15+ reusable components and achieving 90+ Lighthouse score for responsiveness.
- Integrated **Gemini AI** for text generation and **ImageKit AI** for image generation and handling.
- Implemented code highlighting using **PrismJS** for better readability of generated code.
- Developed backend APIs using Node.js, Express.js, and MongoDB, and integrated **Stripe** for payment handling.

SpanEraser

An AI-based image background removal web application built using the MERN stack.

- Integrated ClipDrop API for image processing, enabling automated background removal with high precision.
- Implemented user authentication and session management using **Clerk**.
- Integrated **Razorpay** for secure payment processing within the application.

Education

Diploma in Electronics and Communication

KVG Polytechnic Sullia

2021

Sullia, India

Certifications

SDET (Software Developer Engineer in Test) — By Q-spiders Basavanagudi.

Complete Web Development Course — by Popper Dot Institute

Complete JavaScript Programming: From Novice to Expert — by Knowledge Nest
